3. Scope of works/Technical specifications

3.1 INTRODUCTION

SANEDI is seeking to appoint a service provider to provide services as an Implementing Agent (IA) for the provision of professional services for the decommissioning of existing equipment on site, alteration of an existing building, construction of an additional building, toilet facilities, refurbishment of existing borehole and installation of renewable energy and energy efficiency technologies at Lucingweni Mini Hybrid Project site in the Eastern Cape.

SANEDI is a Schedule 3A state owned entity established under Section 7 of the National Energy Act 2008, (Act No. 34 of 2008). The main function of SANEDI is to direct, monitor and conduct applied energy research and development, demonstration and deployment as well to undertake specific measures to promote the uptake of Green Energy and Energy Efficiency in South Africa.

To promote green and energy efficiency solutions in rural and low income households, SANEDI established the WFE Programme which is one of South Africa's renewable energy initiatives to focus exclusively on solutions for rural and low income peri-urban areas. The Programme focuses on the provision of energy and other related interventions to improve the livelihood of people in low income communities. The initiative places emphasis on labor-intensive options, targeting employment opportunities for women, youths and people with disabilities. WFE is a cross cutting initiative which has the potential for extensive Public/Private Sector Partnership, inter-governmental synergy and cooperative governance within the renewables sector.

3.2 PROJECT BACKGROUND

The Lucingweni mini-grid Hybrid Renewable Energy facility was constructed and operationalised in the early 2002. The facility at full operational capacity comprised an array of Solar PV and Wind turbines with an installed capacity of 100 kW. The facility supplied green electricity through a reticulation network to the village of Lucingweni in the Eastern Cape Province. The objective of the project then was to pilot solutions for providing energy to the most remote areas of the country.

Due to prolonged technical and financial challenges (cash flows), the owners of the facility were left with no option but to shut down the facility. The facility was later vandalized and the bulk of equipment stolen and the remaining rendered technically obsolete. Following an extensive technical assessment the facility and project was declared to be technically and financially unsustainable.

The facility was later transferred to SANEDI under the WFE program with the purpose of utilizing usable equipment and facilities for research and educational purpose within the program. The WFE embarked on a consultative process with stakeholders to ascertain the best option to for maximum benefit of stakeholders from the facility. However, it became clear from the consultative process with the community and its leadership that they were strongly opposed to any efforts of resuscitating the mini-grid system as they perceive the system to be inferior compared to the grid based energy system. The community and its leadership formally made request SANEDI to completely decommission the facility and to transfer some of the remaining equipment and building for the benefit of the community.

In particular the community of Lucingweni village as represented by the local and traditional leadership, the management of local primary school and the provincial Department of Education requested amongst others for SANEDI to consider the following:

- Refurbish existing building structure on site to provide classroom space for a lower Primary School in the village in accordance with the applicable standards as stipulated by the Department of Education
- Finance and construct an additional new building structure to provide additional 2 x classrooms and 1 x administration block on site in accordance with the applicable standards as stipulated by the Department of Education
- Refurbishment of existing infrastructure and installation of new renewable and energy efficient equipment to provide services such electricity, water and sanitation
- Prepare the site to enable the development of small garden and Playground

It is the desire of local stakeholders and SANEDI to have the completed facilities transferred to the Provincial Department of Education and utilized by Mdikane Junior Secondary School (JSS) in Lucingweni village for educational purposes.

This bid therefore, serves as a part of a formal process for the appointment of suitable and capable Implementing Agent (IA) to act on behalf of SANEDI in the implementation of the project as detailed in the Terms of Reference (ToR).

3.3 PROJECT LOCATION

The project site is located at Lucingweni Village adjacent to Huleka Location approximately 90 km outside Umtata, Eastern Cape. The area is under the Konjwayo Tribal Authority in Nyandeni District Municipality. The Project site is located approximately 45 km from R 61 road that leads to Port St Johns and the GPS coordinates are **S 31°49'26.6" E 029°15'48.9"**

The land on which the project is located was initially allotted through permission to occupy by the Tribal Authority for electricity generation purpose. Accordingly a new application for permission to occupy will have to be submitted to the Tribal Authority specifically for educational purposes.

3.4 PROFILE AND STATE OF THE EXISTING STRUCTURE ON SITE

The existing building which is approximately 127 m² in size was used to house Balance of Systems (BOS) for the 100 kW Hybrid mini-grid system in the village. The building is partitioned in two rooms with one room used to house all the (Raylite batteries – 220 Units with 440 cells) batteries whilst the other room used to house inverters and other electronic equipment.

All wind turbines, solar PV modules, inverters and other electronic equipment have been decommissioned and removed from site. However, all the batteries and solar PV module support structure is still on site but will have to be decommissioned prior to alterations of the existing building and construction of a new building.

The physical structure of building is in a relatively good condition but does not have windows, appropriate doors suitable wiring and as such it is not suitable to be used for educational purposes. The site has an existing but not functional borehole which used to supply 3x 6000 litre JOJO water tanks whilst the fourth 2500 litre JOJO water tank is connected to the roof gutters to harvest rain water. The site has no sewage or toilet facilities and is not connected to the municipal electricity network.

The Mdikane JSS is located 3 km from the Lucingweni mini-hybrid project site and currently enrol approximately 756 pupils spanning Grade R up to Grade 9. However, due to overcrowding and security concerns associated with transportation of pupils from far areas to the main secondary school premises, the management of the school and community took a decision to set up facilities close to the project to accommodate pupils in Grade R up to Grade 2. Due to lack of financial resources a dilapidated church build was used to accommodate pupils on the project site. Later on the request of the management of the school Department of Public Works donated 4 containers to accommodate the growing number of pupils

accommodated on the Lucingweni Project site. However, only 3 of the 4 containers are currently being utilised on site. These containers are located approximately 20 m from the Lucingweni site.

The current learner enrolment on the Lucingweni site for the 2017 academic year is as follows:

- Grade R = 66 pupils
- Grade 1 = 60 pupils
- Grade 2 = 58 pupils

Each class is overseen by one educator.

3.5 TENDER OBJECTIVES

The primary objectives of this tender is to invite and appoint suitable and capable service providers with the necessary skills and expertise in the construction sector that can provide professional services to SANEDI on project to decommission, recycle, refurbish and construct physical structure in the village of Lucingweni in the Eastern Cape.

This document therefore serves an invitation to interested service providers to submit bids in the form of proposals to act as an Implementation Agent on behalf of SANEDI under the WFE program for the Project in the village.

3.6 SCOPE OF WORKS

The Bidder is required to provide professional services on behalf of SANEDI for decommissioning, alteration and construction related work at Lucingweni Village in Eastern Cape. The successful bidder will act as an Implementing Agent (IA) for SANEDI throughout all stages of the project. Accordingly, SANEDI will only appoint one contractor to be responsible for the entire project. However, the successful bidder shall have the right to sub-contract the work as may be necessary.

The scope of services to be provided by the Implementing Agent (IA) is provided below. The bidder shall from the commencement date, render services as described in the Work Packages (WP) below:

WP 1: DESIGN OF NEW ADDITIONAL 130 M² BUILDING, ALTERATION AND REFURBISHMENT OF EXISTING 127 M² AND TOILET FACILITIES FOR PUPILS AND STAFF

DESIGN AND PLAN

This stage entails development of a plan and design for:

- A new additional **building** partitioned as follows
 - 2 x class room
 - 1 x admin office
- Altered and refurbished existing **127 m² building** partitioned as follows
 - 1 x class room
 - 1 x kitchen
 - 1 x storage room
- Toilet facilities
 - For pupils (males and females)
 - For staff (males and females)
- Additions
 - Playground suitable for primary school
 - Small garden

The options contemplated above should take into considerations the requirement to provide the two buildings with electricity connected to the municipal network and refurbishment of the existing borehole for provision of water to the site.

The proposed plans and designs shall be in accordance with the Department of Education's National Minimum Norms for similar buildings and the applicable South African National Building Regulations.

The bidder's interpretation of the brief shall be illustrated through the following deliverables as a minimum:

- Concept Design
- Artist Impression

NB: Upon approval by SANEDI the IA shall submit the necessary plans to relevant authorities for approval

WP 2: DESIGN OF COST EFFECTIVE RENEWABLE AND ENERGY EFFICIENT SOLUTIONS

It is the desire of SANEDI to have renewable energy and energy efficient technologies installed on site. Bidders are required to submit proposal for affordable renewable energy and energy efficient technologies taking into account the location, existing infrastructure and operational requirements of the school. Bidders are encouraged to consider technologies such as:

- Solar water heaters
- Solar PV for lighting
- Biogas generation from biogas digesters to cooking purpose

WP 3: IMPLEMENTATION

SITE CLEARANCE, DECOMMISSIONING AND RECYCLING OF BATTERIES, SCRAP METAL AND DISPOSAL OF ALL SCRAP MATERIAL

The bidder shall procure or supply services to perform the following tasks:

- Decommissioning of all batteries (Raylite batteries – 220 Units with 440 cells), metal and wooden structure on site
- Identify and obtain quotes for scrap value from suitable recycling companies for all batteries and metal structure
- Clear site of any debris
- Dispose all material of no value to the project in accordance with the applicable standards or practices
- Upon approval by SANEDI the IA shall deliver all recyclable material to the recycling company that provides best value for the recycled material

The rights of Bidder

- Bidder shall have the right to receive from the recycling company the total amount tendered for recycled material.
- Bidder shall deduct from the amount tendered for recycle material the cost incurred for labor, transportation and others related to decommissioning and recycling of material from the project site.

- Bidder shall credit or debit any balance between the tendered amount for recycled material and the cost associated with decommissioning and recycling such material
- Bidder shall clearly indicate such credit or debit in the total cost breakdown for the tendered amount for the bid

CONSTRUCTION AND ALTERATIONS OF THE TWO BUILDINGS

The Bidder shall directly procure or team up with service providers for services such as quantity survey, electrical, civil and structural and any other as may be necessary. The bidder shall bear overall responsibility for all the construction related work, refurbishment of the existing building and borehole for provision of water to the site.

NB: The Bidder shall ensure all its contractors are at all times compliant with the applicable regulations, minimum standards and certified by relevant institutions such as but not limited to **CIDB**. In addition the bidder shall ensure that material and equipment procured and utilised in the project are compliant with the minimum standards applicable.

INSTALLATION OF RENEWABLE ENERGY TECHNOLOGIES

Upon approval by SANEDI, the IA shall procure the necessary services to procure and install the selected technology options

NB: The Bidder shall ensure all its contractors are at all times compliant with the applicable regulations, minimum standards and certified by relevant institutions such as but not limited to **CIDB**. In addition the bidder shall ensure that material and equipment procured and utilised in the project are compliant with the minimum standards applicable

Inclusions for implementation

- The IA shall procure the necessary professional services, material and equipment required to implement the project.
- Assistance with the application process for connection of the two buildings to the municipal electricity network

Exclusions for implementation

- Procurement and delivery of school furniture on site

Time frame for implementation

The implementation phase of the project shall be completed within a maximum of **6 months** of receipt of the required approval from relevant authorities.

3.7 BIDDER'S PROPOSAL

The bidder shall submit a proposal in response to this RFP which shall at least contain the following sections:

- **Executive Summary**

The bidder must provide an executive summary of its response. The executive summary must not exceed 2 pages in length. The executive summary should communicate to the SANEDI team on: the bidder's offering; the approach; and the value proposition.

- **Implementation Approach**

The bidder must provide a detailed description of its proposed overall approach, including a description of the major activities that it will employ in delivering the project. The bidder shall also identify the role of all its contractors including the approach to selecting such contractors to ensure compliance with the minimum standards for work undertaken on the project.

- **Key Deliverables**

This section should include a description and the list of key deliverables that will be developed.

- **Proposed Project Plan**

The bidder must provide a project plan, which shall include specific activities, resources and time frames linked to deliverables and milestones. The plan should also comprise a section on health and safety.
