1. Notice And Invitation to Submit Proposals

The **SOUTH AFRICAN NATIONAL ENERGY DEVELOPMENT INSTITUTE** invites suitably qualified and experienced service providers to submit priced proposals for the supply of goods and services as indicated in the Scope of Works herein.

SANEDI is a research and development entity established as a juristic person in terms of the Energy Act, Act 34 of 2008. SANEDI' key focus areas are research and development into new energy technologies and energy efficiency.

Respondents must comply with the terms and condition as specified in this Bid Document either in their singular capacity or as part of a Joint Venture or consortium.

Potentially emerging enterprises and SMME's who satisfy criteria stated in the Submission Data may submit proposals

Only respondents who submit fully completed priced proposals incorporating all Returnable Schedules duly complete and signed will be eligible to have their submissions evaluated

Queries relating to the issue of these documents may be addressed to

Ms. Vulani Ngoveni

The Submission E-Mail address designated is 0422a.procurement@sanedi.org.za</p> <p>The Bidder shall ensure that the Bid Documents Returnable Schedules together with all Statutory Returns are duly completed, signed and scanned and uploaded to the designated E-mail address in a lock PDF format file.</p> <p>Documents transmitted in an editable format will be regarded as non-returns and may render the submission unresponsive. Telephonic, telegraphic, telex, facsimile submissions offers will not be accepted.</p> <p>The size limits for SANEDI Email is 20 MB. Bidders may submit more than one E-mail.</p>
5.	<p>The closing time for submissions is as stated in the Notice and Invitation to Submit a Proposal Quotation, in the manner specified is</p> <p>Closing date: Monday 06 March 2023 at 11h00</p> <p>NO Late submissions, or submissions not deposited in the designated e-mail address will be considered, and it is incumbent on the Bidder to ensure that their submission together with all supporting documentation is in the designated e-mail address before the closing Time and date specified.</p>
6.	<p>The Bidder holds SANEDI harmless and indemnifies SANEDI in the event of any failure that prevents or delays the bid submission from being in the designated Tender Box/email address at the time of Bid Closure.</p> <p>Bidders are prohibited from using SANEDI Staff acting as their couriers, agents or delivery mediums to deposit bids in the tender box, and the bidder acknowledges that the use of SANEDI staff in this way will immediately disqualify their tender submission.</p> <p>It is the sole responsibility of the bidder to ensure that the documents submitted via PDF format are not corrupt and that any corrupt documents received by the closing date will be automatically excluded from being evaluated.</p>

7.	<p>Information and data to be completed in all respects</p> <p>Accept that Bid offers, which do not provide all the data or information requested completely and in the form required, may be regarded by the Employer as non-responsive.</p> <p>Accept that the Employer shall not assume any responsibility for the misplacement or Premature opening of the tender offer if the Bid is not submitted in the required format and clearly marked with the bid reference and placed in the designated tender box before bid closing.</p>
8.	SANEDI reserves the to rotate suppliers according to SANEDI’s rotation policy.
9.	SANEDI reserves the right to independently verify Information that is submitted by the bidder.
10.	Bidders are prohibited and will be disqualified if they share resources amongst themselves for the same tender e.g. the proposed team member of company “A” is also a team member of company “B”.

3. Scope Of Works/Technical Specifications

The purpose of this Terms of Reference is to appoint a service provider for the development and deployment of an online National Building Energy Performance Register (NBEPR) which will constitute a database and web platform for capturing building's registration, information, and generate energy performance certificates in South Africa,

3.1 BACKGROUND

The Minister of Mineral Resources and Energy has under section 19(1)(b) of the National Energy Act, 1998 promulgated the Regulations for the Mandatory Display and Submission of Energy Performance Certificates (EPC) for Buildings on 08 December 2020.

Energy Performance Certificates are mandatory for private sector, non-residential buildings with a total net floor area of 2,000m² and more, and government owned, occupied, or operated buildings of 1,000 m² and more.

Energy Performance Certificates must be displayed at the building's main entrance; and a certified copy of the EPC submitted by the building owner/accounting officer to the South African National Energy Development Institute (SANEDI) within 3 months from the date the EPC is issued.

SANEDI is mandated by the Regulation for the Mandatory Display and Submission of Energy Performance Certificates for Buildings to maintain a National Building Energy Performance Register (NBEPR). This register must include the particulars of all buildings that fall within the regulated building classifications as well as all issued energy performance certificate together with relevant assessment data.

It is therefore, of importance that SANEDI deploys an online NBEPR that can serve as a register and data repository of all buildings within the regulated building classifications in South Africa. The NBEPR should be accessible online and accommodate high rate of users. The DMRE wishes for building owners/accounting officers who own, occupy, or operate buildings that fall within the requirements and identified occupancy classes to be able to register their buildings on the NBEPR platform regardless of whether they are pursuing an EPC in the immediate future or not.

To comply with the Regulation and to ensure the accuracy of the underlying EPC calculations undertaken in line with the South African National Standard for EPCs (SANS 1544:2014), building owners/accounting officers will be required to upload the constituent EPC data into the NBEPR. The NBEPR will increasingly provide an invaluable source of information for assessing and informing energy efficiency policy and energy footprint of the private and public sector building stock that fall within EPC Regulations.

To ensure sustain Energy Performance Certification mechanism in South Africa, the NBEPR must account for the needs of its key stakeholder groups, namely, the Department of Mineral Resources and Energy (DMRE), SANEDI, building owners, accounting officers, SANAS accredited Inspection Bodies, other relevant public entities, and the general public.

3.2 OBJECTIVES OF DEPLOYING AND DEVELOPING THE AUTOMATED ONLINE NBEPR

The overall objective of this project is to have an online database and web platform for building registrations and hosting of all valid building information for EPCs. In addition, it should host certified copies of EPCs issued by a SANAS accredited Inspection Body in terms of the Regulation and SANS 1544:2014 and keep record of all specified data used to determine the EPC rating.

3.3 TECHNICAL REQUIREMENTS FOR THE DEPLOYMENT AND DEVELOPMENT OF THE ONLINE NBEPR

3.3.1 The technical requirements for the deployment and development of this and online NBEPR are stated within this section, providing detailed description of the required functionality of the online NBEPR. The online NBEPR shall be developed primarily to address the needs of users and system administrators (DMRE and SANEDI).

Below are tasks the appointed service provider shall carry out during the contract period:

3.3.1.1 Develop a user-friendly online NBEPR database portal that will serve as a medium for buildings registration, hosting of already issued EPCs with corresponding dataset, host certified copies of issued EPCs, accessible to all users like the DMRE, SANEDI, building owners, accounting officers, inspection bodies and other relevant parties. The design of the NBEPR should incorporate both SANEDI and the DMRE's Corporate Identities (CI). The portal should be able to handle all application type requests with automated responses as required, inclusive of database redundancy for safety, disaster recovery purposes system continuity. **50 working days.**

3.3.1.2 Deploy and test the online NBEPR to meet user requirements, functionality, usability, security, compatibility, and performance. The NBEPR should be able to automatically issue new EPCS and building registration numbers for new registration and to detect duplicate entries of data to avoid duplications of numbers. **30 working days.**

3.3.1.3 Developing a website with Energy Performance Certificate related web pages and related contents for all groups of stakeholders to access information pertaining to Energy performance Certificates in South Africa. The design of the NBEPR should incorporate both SANEDI and the DMRE's Corporate Identities (CI). Every single content required for this website is already hosted on the SANEDI EPC webpage and must be migrated to the new website– **20 working days.**

3.3.1.4 Migrate the already existing MS. Excel-based NBEPR onto the newly deployed online NBEPR. The current data on MS excel should be accurately loaded and integrated into the new online NBEPR. **10 working days.**

3.3.1.5 Provide training to **15 officials** in a **minimum of 5 days.** In addition, develop a Standard Operating Procedure manual on the online NBEPR for core SANEDI and DMRE officials administering the system in accordance with their respective Roles and responsibilities.

3.3.1.6 Provide support and maintenance for the system for a period of **24 months.**

Note: Where possible, adjust the above specified task duration in your planning. Some tasks can be carried out in parallel, and others may require task dependencies completed first. Fast tracking the project tasks to achieve shorter duration than 4 months is encouraged if the quality of the system is not compromised in the process.

3.4 User Needs

The minimum user needs are based on the minimum functional requirements to be determined during system development. This is merely an indication of the system portfolios that needs to be developed within the NBEPR system. To meet the user needs of the main stakeholder groups which include, i) access to the platform for building owners and accounting officers, building registration, ii) access to register buildings and upload EPC data into the database, iii) access to the back end for administrative purpose.

3.5 Minimum Functional Requirements

Table 1 illustrates the minimum functional requirements to meet user needs. A link between each functional requirements is needed to meet user needs, and the corresponding technical specifications in bidders' submissions. Detailed functional requirements will be determined and discussed during the development of the system with the successful bidder.

Table 1: Minimum Functional Requirements of Online NBEPR.

NBEPR minimum functions /User needs	Description
FRQ1 – Online web portal access (Access/Admin/Register)	Users will be able to access information on the NBEPR based on access Privileges (Public/Admin/Registered)
FRQ2 – Search for Building and EPC Validity Period	Users will be able to search for a building EPC data and validity of its EPCs.
FRQ3 – Find Accredited Inspection Bodies	Users will be able to find accredited Inspection Bodies
FRQ4 – Dashboard	Users will be able to view buildings energy performance and EPC statistics on the web page
FRQ5 – View building energy performance and validity of EPCs available online as PDF/Html file	All users will be able to view building energy performance and validity of EPC online in PDF/Html
FRQ6 – User Management	Admin user will be able to manage users, approve registration
FRQ7 – Data Management	Admin user will be able to manage data, backups, and maintenance.
FRQ8 – Data extraction	Admin user will be able to extract data for monitoring and modelling.
FRQ9 – Content management	Admin user will be able to manage content, backups, and maintenance.
FRQ10 – Document management	Admin user will be able to manage documents, backups, and maintenance

NBEPR minimum functions /User needs	Description
FRQ11 – Web portal management	Admin user will be able to view and edit to web portal settings (Server settings, Proxy settings, database settings, Mail settings)
FRQ12 – User registration FRQ13 – EPC data view FRQ14 – System generated unique EPC & building Registration Numbers FRQ15 – View and Export/Print signed EPC PDF/html FRQ16 – Upload certified copies of EPCs in a document manager	Users will be able to register their profile and building data (upload all supporting documents) Authorised user will be able to preview uploaded building/EPC data and a demo of a valid EPC. Authorised user will receive system generated unique EPC & building No Authorised user will be able to view, download and print signed EPC for their display. Authorised user will be able to upload valid signed and certified EPC in a system generated document manager.
FRQ17 – Required EPC data must be uploaded into online NBEPR. FRQ18 – Validation of uploaded EPC data FRQ19 – Preview EPC FRQ20 – Issue EPCs PDF/Html file SANAS logo, company logo & with rating info FRQ21 – Upload signed EPC. FRQ22 – Building Tracker	Authorised user will be able to upload building/EPC data into the NBEPR manually or automatically using excel template Authorised user will be able to validate uploaded data via system generated algorithm Authorised user will preview system generated of EPC for approval Authorised user will issue a system generated EPC in PDF/Html file with all relevant logos and building information Authorised user will be able to upload Electronic signed EPC. Authorised user will be able to track registered buildings using Building registration/Unique EPC numbers.

3.6 Online NBEPR - Non-functional Requirements

In addition to meeting the detailed minimum functional requirements, the online NBEPR will need to meet several non-functional requirements to ensure that it provides a robust, stable, accessible, and effective platform. However, the main categories of non-functional requirements of the online NBEPR include:

- Architectural goals and constraints – require for the overall architecture of the system to provide a highly available and user-friendly web portal for NBEPR users, and to understand what programs and services are available.
- Guiding principles – requires that the system is scalable, flexible, standards-based.

- User Experience (UX) and User Interface (UI) design patterns – requires a deep understanding of user needs, abilities, and limitations to ensure users can effectively interact with the system. Existing design pattern catalogues should be used for the design of the NBEPR.
- Design principles – requires for the system to work with a range of modern browsers that support HTML, DHTML, CSS, JavaScript, and XML and for business rules to be encoded within the application development framework.
- Accessibility for people with disabilities – requires for the design and function of the system to include principles that provides access to people with disabilities.

3.7 Database Design

The design of a fully functional online NBEPR is crucial. Ensuring the database is built in such a way as to allow for accurate and up-to-date information to be transferred to relevant components and users of the online NBEPR is crucial.

3.7.1 Data Governance and Policies

The online NBEPR should be conform to the Protection of Personal Information Act No. 4 of 2013 (POPIA). This Act requires adequate measures be taken on the collection, processing, and sharing of personal and business information like+ ID numbers, names, addresses, account numbers etc. The online NBEPR must be transparent and accountable when handling personal information—ensuring that users have the right to access personal information that was collected, in addition, the online NBEPR will be governed by SANEDI's current IT policies and standards like ITIL, COBIT and other international IT best practices.

3.7.2 Home Page

Building and Energy Performance information should be available on the home page of the online NBEPR. The contents should be listed as per the relevance for specific user groups and their interaction with the online NBEPR. This will further be elaborated during the specification development process.

The following is an example of what should be included in the list but not limited to:

- EPC related content
- Building registration related content
- Ticketing system
- List of SANAS accredited Inspection Bodies
- SANAS Accreditation Process
- Profile management
- User Guides/ Management
- Site Feedback
- Help
- Contact details.

3.7.3 System architecture

The System Architecture is shown in Figure 2 below. SANEDI will host an online NBEPR internally and provide a required hardware for the web applications.

Figure 1: System Architecture

3.8 Software and database options

Stated in Table 2 below are options of software applications, database, and web server applications for the service provider to base their quotation on.

Table 2: Optional Software applications for NBEPR System.

SOFTWARE	DATABASES	WEB SERVERS
PHP	MySQL	Apache
HTML 5, CSS		Nginx
JavaScript		Microsoft IIS
Node JS		
act		
Java		

3.9 Additional system requirements

As discussed in further sections, there are several additional system requirements to consider in the NBEPR development process.

3.9.1 Performance requirements

Response time and loading speed must be aligned to web-based best practices.

3.9.2 Safety, security, and environmental requirements

Specific user groups will be created that will have access to the system with certain rights. The online NBEPR must have a firewall and an up-to-date SSL certificate protection to ensure web security from

hackers. Security should be aligned to SANEDI IT policies and international best practices ISO/IEC 27001/ 27002 Information security management. Login security (password protected with captcha). In addition, data encryption and protection against malware must be integrated.

3.9.3 Maintenance requirements

- **Hardware Maintenance:** The IT Manager at SANEDI should test the hardware frequently. Otherwise, it will be conducted by the cloud hosting service provider.
- **Information system maintenance:** The IT Manager will perform updates of master files, such as adding and deleting users.
- **SANEDI IT Department Network Maintenance:** Taking care of the network's overall health (anticipating, preventing, and solving the problems, troubleshooting, cable testing).
- **Security Maintenance:** The SANEDI IT Manager would ensure that the systems remain secure all the time. The Security maintenance service would include backups, checking permissions and ownerships in critical files and directories, checking the assignment of rights, monitoring system logs etc. Otherwise, conducted via the cloud hosting service provider.
- **Preventive Maintenance:** The SANEDI IT Manager would perform proactive maintenance to prevent system problems. Its purpose is to minimise breakdowns and excessive depreciation. Otherwise, this could be conducted by the cloud hosting service provider.

NOTE: All hardware will be provided by SANEDI's IT Department

4. Preference Points

PREFERENCE POINTS CLAIM FORM IN TERMS OF THE PREFERENTIAL PROCUREMENT REGULATIONS 2022

NB: BEFORE COMPLETING THIS FORM, TENDERERS MUST STUDY THE GENERAL CONDITIONS, DEFINITIONS AND DIRECTIVES APPLICABLE IN RESPECT OF THE TENDER AND PREFERENTIAL PROCUREMENT REGULATIONS, 2022

1. GENERAL CONDITIONS

1.1 The following preference point systems are applicable to invitations to tender: - the 80/20 system for requirements with a Rand value of up to R50 000 000 (all applicable taxes included); and - the 90/10 system for requirements with a Rand value above R50 000 000 (all applicable taxes included).

1.2 Preference Points applicable:

a) The applicable preference point system for this tender is the **80/20** preference point system.

1.3 Points for this tender shall be awarded for:

- (a) Price; and
- (b) Specific Goals.

1.4 The maximum points for this tender are allocated as follows:

	POINTS
Price	80
Specific Goals	20
Total points for price and specific goals	100

1.5 Failure on the part of a tenderer to submit proof or documentation required in terms of this tender to claim points for specific goals with the tender, will be interpreted to mean that preference points for specific goals are not claimed.

1.6 SANEDI reserves the right to require of a tenderer, either before a tender is adjudicated or at any time subsequently, to substantiate any claim in regard to preferences, in any manner required by the SANEDI.

2. DEFINITIONS

- (a) “tender” means a written offer in the form determined by an organ of state in response to an invitation to provide goods or services through price quotations, competitive tendering process or any other method envisaged in legislation;
- (b) “price” means an amount of money tendered for goods or services, and includes all applicable taxes less all unconditional discounts;
- (c) “rand value” means the total estimated value of a contract in Rand, calculated at the time of bid invitation, and includes all applicable taxes;
- (d) “tender for income-generating contracts” means a written offer in the form determined by an organ of state in response to an invitation for the origination of income-generating contracts through any method envisaged in legislation that will result in a legal agreement between the organ of state and a third party that produces revenue for the organ of state, and includes, but is not limited to, leasing and disposal of assets and concession contracts, excluding direct sales and disposal of assets through public auctions; and
- (e) “the Act” means the Preferential Procurement Policy Framework Act, 2000 (Act No. 5 of 2000).
- (f) “B-BBEE” means broad-based black economic empowerment as defined in section 1 of the Broad-Based Black Economic Empowerment Act;
- (g) “B-BBEE status level of contributor” means the B-BBEE status of an entity in terms of a code of good practice on black economic empowerment, issued in terms of section 9(1) of the Broad-Based Black Economic Empowerment Act;
- (h) “bid” means a written offer in a prescribed or stipulated form in response to an invitation by an organ of state for the provision of goods or services, through price quotations, advertised competitive bidding processes or proposals;
- (i) “Broad-Based Black Economic Empowerment Act” means the Broad-Based Black Economic Empowerment Act, 2003 (Act No. 53 of 2003);
- (j) “EME” means an Exempted Micro Enterprise in terms of a code of good practice on black economic empowerment issued in terms of section 9 (1) of the Broad-Based Black Economic Empowerment Act;
- (k) “functionality” means the ability of a tenderer to provide goods or services in accordance with specifications as set out in the tender documents.
- (l) “proof of B-BBEE status level of contributor” means:
 - B-BBEE Status level certificate issued by an authorized body or person;
 - A sworn affidavit as prescribed by the B-BBEE Codes of Good Practice;
 - Any other requirement prescribed in terms of the B-BBEE Act;
 - “QSE” means a qualifying small business enterprise in terms of a code of good practice on black economic empowerment issued in terms of section 9 (1) of the Broad-Based Black Economic Empowerment Act;

Note to tenderers: The tenderer must indicate how they claim points for each preference point system.

5. Technical Evaluation Criteria

5.1 Phase 1: Initial Screening Process: At this phase bidder's response are reviewed to check if bidders have responded according to SANEDI's RFP document.

5.2 Phase 2: Mandatory Requirements: It must be noted that bidders who fail to meet any of the *MANDATORY REQUIREMENTS* will be disqualified and not be evaluated further.

5.2 Technical evaluation: Bidders will be evaluated according to the below technical evaluation criteria.

Minimum Technical Threshold is **70%**.

It must be noted that if the Bidder does not meet the 70% minimum threshold, the bidder will be disqualified and not be evaluated further.
