3. Scope of works/Technical specifications

3.1 PURPOSE

The purpose of this Request for Quotation (RFQ) is to appoint a Technical Expert to:

3.1.1 Conduct an analysis of existing national governance structures and legislative instruments to determine relevance to Industrial Energy Efficiency implementation by Department of Mineral Resources and Energy (DMRE) and the South African National Energy Development Institute (SANEDI).

3.1.2. Coordinate and conduct stakeholder engagement activities within DMRE, SANEDI and other relevant public institutions to determine the alignment of governance structures and policy instruments to improve energy efficiency in the industrial sector.

3.2 PROJECT BACKGROUND

Industrial Energy Efficiency Improvement in South Africa through Mainstreaming the Introduction of Energy Management Systems, Energy Systems Optimisation and the Energy Management Standard ISO 50001 Series.

The Industrial Energy Efficiency (IEE) Phase II Project is funded by the Global Environment Facility (GEF) with co-funding through the South African Department of Trade, Industry and Competition (the dtic), and Department of Mineral Resources and Energy (DMRE) The work is implemented by UNIDO and executed by the National Cleaner Production Centre South Africa (NCPC-SA – and a programme of the dtic), and the Department of Mineral Resources and Energy (DMRE) through the South African National Energy Development Institute (SANEDI).

Industrial energy performance has improved over the past years to some degree, especially in larger enterprises, as a result of the national power constraints and ensuing increases in energy and electricity prices, new legislative measures, financial incentive schemes and project initiatives. The Department of Mineral Resources and Energy (DMRE) through its Energy Efficiency programme and its implementation agency, the South African National Energy Development Institute (SANEDI) is tasked with the development or improvement of the required legislative instruments and governance structures to ensure effective implementation of the industrial energy efficiency initiatives.

The South African 'National Energy Act' No. 34 of 2008 is the legal instrument by which the supply and consumption of energy is governed in South Africa. The Energy Act aims to ensure that diverse energy resources are available, in sustainable quantities and affordable prices, to the South African economy in support of economic growth and poverty alleviation, taking into account environmental management requirements. Moreover, the Energy Act provides the DMRE with the legal mandate and obligation, among other conditions, to: collect, collate and analyze energy data and information, and introduce minimum energy performance specifications for processes and equipment. Furthermore, the Energy Act also has the objective of facilitating the effective management of energy demand and its conservation including, among others, the improvement of energy efficiency in the industrial sectors.

While the Energy Act gives considerable powers to the DMRE (and hence the government) to develop energy efficiency regulations, and the enforcement of some of these regulations lies with the Department of Trade, Industry and Competition's (dtic) National Regulator for Compulsory Specifications, reporting and compliance of greenhouse gas emissions lies with the Department of Environment, Fisheries and Forestry (DEFF).

The IEE Phase II Project has two components, and DMRE and SANEDI are mainly responsible for Component 1 & 2. The description of these components are as follows:

Component 1.0: Data Quality Improvement to Facilitate Data Rich Industrial Energy Efficiency and Energy Management Policy Implementation – Expected Outcomes: Strengthened energy management planning (and related energy and GHG emissions reduction target setting) through improved data and reporting on energy consumption and potential savings under EnMS and ESO. (Note: The SA IEE Phase II GEF Project will assist the Government of South to improve industrial energy consumption data gathering and quality, as this remains a significant barrier to policy implementation).

Component 2.0: Strengthening Policy Implementation and Support Frameworks for EnMS, ESO and Energy Management Standards – Expected Outcomes: Enhanced promotion of investment in IEE through strengthened policy and regulatory frameworks and support to increase the uptake of energy management standards. (Note: The SA IEE Phase II GEF Project will work with multiple Government Departments and Agencies in order to assist in better implementation and coordination of policy and regulatory mechanisms). The original SA IEE Project worked extensively to institutionalize the main ISO 50001 standard, the SA IEE Phase II GEF Project will continue this work but expand to the rest of the series i.e. ISO50002, ISO50003, ISO50006, and ISO50015 which is analogous to SANS 50010).

It should also be noted that although the South African energy policy is overseen and coordinated by DMRE in accordance with the National Energy Act, and other relevant legislations, other government departments also play a significant role in the improvement of industrial energy efficiency. For example, **the dtic** is the entry point for a number of existing financial incentive schemes that intended to promote increased industrial energy efficiency, whilst DEFF is also key to the reduction of greenhouse gas emissions.

It is for these reasons that the SANEDI would like to request Technical Experts to submit quotations for the analysis of existing national governance structures and legislative instruments to determine relevance to industrial energy efficiency implementation.

3.3 SCOPE OF WORK

The scope of work for this Project is defined as follows:

- 3.3.1 Inception report** inception report covering project plan with intermediate and final outputs and timelines, project risk and mitigation strategies, stakeholder engagement process – **10 days**
- 3.3.2 Analysis and update/develop** existing national governance structures relevant to industrial energy efficiency implementation - **30 days**

- Analysis of international examples of national governance structures for successful implementation of industrial energy efficiency initiatives to explore synergies with existing SA's national governance structures.
- Assess and update/develop the existing roles and responsibilities (governance structures) within DMRE and SANEDI on the implementation of industrial energy efficiency initiatives.
- Assess and update/develop the existing roles and responsibilities (governance structures) of other government departments or institutions on the implementation of industrial energy efficiency initiatives.
- Support the DMRE and SANEDI to **update or develop governance framework and processes** within government departments or institutions for the successful implementation of industrial energy efficiency initiatives.

3.3.3 Analysis and update/develop existing legislative/institutional instruments relevant to the industrial energy efficiency implementation – 30 days

- Analyse the existing legislative/institutional instruments that could be relevant for the successful implementation of industrial energy efficiency initiatives.
- Support the DMRE and SANEDI in the identification of legislative instruments that could be **updated or developed by relevant** national government departments or institutions for successful implementation of industrial energy efficiency initiatives.
- Assist the DMRE and SANEDI in the development of a legislative instruments that will support active participation of women and also create a conducive environment for job creation and enterprise development.

3.3.4 Conduct Technical Capacity Building and Stakeholder Engagements to assess and review national governance structures and policy instruments – 20 days

- Identify key government departments or institutions and develop a **stakeholders' matrix for consultation process** on the implementation of industrial energy efficiency initiatives.
- Conduct technical assistance and capacity building to key governmental departments or institutions in the form of **two virtual online workshops** on governance structure synergies and policy instruments for successful implementation of industrial energy efficiency.
- Assist government officials to **better re-formulate, expand and strengthen governance structures and legislative instruments** that will ensure successful implementation of industrial energy efficiency initiatives.
- **Support** the DMRE and SANEDI in the development of **Terms of Reference** for the establishment of a National Industrial Energy Efficiency Implementation Working Group for better coordination and reporting of energy efficiency implementation within the industry sector.

Note:

- All costs should be built into the quotation and not stated separately.
- Task days provided above are estimates, some task can run in parallel and sequence, but total project duration is 60 days.

4 Evaluation Criteria

14.	The evaluation criteria that are to be scored and the maximum score assigned to each of such criteria are as follows:		
	Criteria	Scoring Guidelines (1-10)	Weighting
	Competency, capacity and experience of the Technical Expert Evidence: Resume of Technical Expert detailing qualification, capability in academic research, years of experience in same or similar studies, industry knowledge demonstrated by previous work experience	0 points - 0 years of relevant competence, capabilities and experience in basic energy policy research. 2 points - 1 years of relevant competence, capabilities and experience in basic energy policy research. 5 points - 3 years of relevant competence, capabilities and experience in basic energy policy research. 10 points - 5 years or more of relevant competence, capabilities and experience in basic energy policy research.	30%
	Reference Letters Evidence: The reference letter must have a description of the project work and topics of research, the duration, the value of contract and a statement acknowledging the quality of work done.
