

The Portable *Solar baby Turtle*® Kiosk

SolarTurtle's latest solar product is HERE!

"Swap-out a powerbank-battery & carry on with your smart day!"

The Solar baby Turtle offers unique safety, flexibility and innovation. In the morning the solar panels unfold from their secure location to feed on the rays of the sun. In the evening the panels fold away into a tamper-proof hard shell. Solar baby Turtle® is ideal for:

- **Persons-On-The-Move**
- **Festivals**
- **Sports Events**
- **Open Markets (Hawkerville)**
- **Taxi Commuter Stations**
- **Bus & Train Commuter Stations**

Services include:

- **Wi-Fi Hotspot**
- **Airtime Services**
- **Snacks & Cooking**
- **Printing & Copying**

There is a gap in the market for a small solar-kiosk that can provide battery-charging & WiFi options to meet the ever growing reliance on smartphones and other ICT devices. People are on the go and need to have their devices charged all the time. What if you can just swap-out a powerbank-battery and carry one with your smart day? This service will offer convince to cities and rural communities alike. The demand for accessible electricity in pay-as-you-go increments has been proven across Africa. We at SolarTurtle just want to take it a step further.

The BabyTurtles will enable us to utilize the lessons we have learnt over the years, of working with off-grid communities to produce cost-effective energy-kiosks ready for rapid scale-up across Africa.

Three new micro-solar-energy-kiosk designs, each with an integrated SME¹ e-learning and ICT management system. A small version that can be transported on a taxi, a medium version that can be pulled or peddled to trading locations, and a larger version, like a trailer, that can be used for events and offer a wider range of products and services.

The solar panels unfold and it can start recharging batteries, phones and other small rechargeable appliances for an income

The BabyTurtle will be able to recharge solar-power-banks that customers can take with them to power their devices for the day.

¹ Small medium Enterprise (SME)

SolarTurtle SA is an award-winning social business that has a proven track record of promoting enterprise development in less-privileged communities

through tailored renewable energy technologies.
